

Hybrid Next Gen
Textiles for the
electric era

camira

The future of transport is here, and Hybrid Next Gen is made for it.

Small in scale and big in impact, this wool rich fabric is now available in 64 designs, all in the most contemporary of colour palettes.

Impeccably smart and intelligently designed, these patterns are what you've been waiting for.

Specification

Hybrid Next Gen (Q204)

Transport
seating

Year guarantee

With the sleekness of a sports car, Hybrid Next Gen brings automotive modernity to mass passenger transport. A collection of futuristic, small scale patterns, these textiles are an evolution - and a revolution. Creating the appearance of a flat woven fabric, an all loop face delivers high traffic performance in a lighter weight construction. Perfect for the electric era, a wool rich composition is both natural and beautifully tactile.

Technical Information

Composition

Pile: 85% Wool, 15% Polyamide
Ground: 42% Cotton, 31% Polyester, 11% Viscose

Width

150 cm minimum

Weight

805g/m² ±5% (1208g/lin.m ±5%)

Abrasion Resistance

≥80,000 Martindale cycles
(ISO 14465)

Flammability

FMVSS 302
EN 45545 (R21) – HL3 when FR treated
ECE Reg 118 Annexes 7 & 8 with FR backcoat
Note: flammability performance is dependent on components used FR performance is based on the FR treatment applied

Light Fastness

6 (ISO 105 - B02)

Fastness to Rubbing

Wet: 4, Dry: 4 (ISO 105 - X12)

Cleaning

Vacuum regularly. Wipe clean with a damp cloth or shampoo using proprietary upholstery shampoo. For full details, see cleaning guide.
