Wired is an intricately detailed fabric collection which subtly moves from one surface texture to another through a carefully constructed mix of pile heights and handles. Some areas of the fabric surface are presented as all cut moquette and others in all loop to create a complex textural transport upholstery which combines both unique aesthetics and high performance.

The collection is designed around small scale textures and patterns with highlight accent colors of muted blues, greens, subdued orange and vivid red set against darker gray grounds. The design effects span illusory, graduated and delicate dappling to set a tone of poise and refinement.
