A new addition to the RePlay portfolio of products, RePlay Zero 66 is a wider width adaptation of our 100% post-consumer recycled polyester fabric, RePlay Zero. Manufactured entirely from recycled plastic bottles, this fun and flexible fabric is ideal for acoustic panels. Its two-tone micro detailing and cellular surface texture creates a futuristic look which is perfect for the modern, hybrid world.

Zero chemistry

A woven fabric with a knitted appearance, RePlay Zero 66 is free from any added chemicals. Future thinking, forward moving, and environmentally intelligent, this textile is PFAS and TCPP free, as well as EU Ecolabel, Indoor Advantage Gold and Oeko-Tex Standard 100 certified. Woven from post-consumer recycled plastic bottles, RePlay Zero 66 does its part to protect precious resources and human health.

Fun, flexible and functional

Made for hybrid work and leisure spaces, RePlay Zero 66 pairs seamlessly with RePlay Zero for flawless integration, from seats to screens. Here for the home office, the workspace in the city, and the collaborative hub that's anywhere in-between, RePlay Zero 66 is as fun to work with as its name suggests. Acoustically transparent and bleach cleanable, RePlay Zero 66 is designed for wrapped wall panels, acoustic screens, clouds and dividers.

Playful palette

A 33-shade color palette filled with personality, RePlay Zero 66 flips between the bold brights of an extrovert to the muted tones of an introvert, without missing a beat.

It has the bestselling shades you know and love, trend-led hues with an eye on the future, and the timeless neutrals you can't live without. A complex dye technique creates a multi-layered coloration which brings an appealing depth to each shade, and a two-tone detail for the smartest of finishes.
